

Advanced Deposits Policy

Many people bring us vehicles that are in a state of disrepair because they have not been maintained. Often, they have not been driven regularly or even for years. When we encounter one of these vehicles, it is our policy to ask the owner for an advanced deposit to insure they are serious about investing in restoring it to driving conditions. For other major repairs on all vehicles, we request a deposit to cover parts and labor.

Once we inspect the vehicle and can provide an estimate of the cost to repair it, the customer can approve the repairs or decline further work. If further work is declined, we will refund the amount remaining from the deposit after the cost of the inspection and diagnostic work has been paid.
